Amendments to the Claims:

The listing of claims will replace all prior versions and listings of claims in the application. No amendments to the claims have been made. This listing is provided merely for continuity across documents and as a convenience to the Examiner.

5

Listing of Claims:

Claim 1 (Previously Presented): An input method combining verbal and handwritten inputs, the input method comprising:
utilizing a speech recognition algorithm to generate a first list according to verbal
10 input;
utilizing a character recognition algorithm to generate a second list according to
handwritten input;
generating a third list that is an intersection of characters common to the first list
and the second list; and
15 presenting the third list to a user.

Claim 2 (Original): The input method of claim 1 further comprising providing at least
a database from which characters are selected by the speech recognition
algorithm and the character recognition algorithm to fill the first list and the
20 second list, respectively.

Claim 3 (Original): The input method of claim 2 further comprising adding a first
character to the database, the first character generated by the user using an
auxiliary input method.

25

Claim 4 (Original): The input method of claim 3 wherein the speech recognition
algorithm utilizes a first standard for speech recognition, and adapts the first
standard to verbal characteristics of the user.

30 Claim 5 (Original): The input method of claim 4 wherein the verbal characteristics of
the user corresponding to the first character are added to the database.

Appl. No. 09/836,209
Amdt. dated December 8, 2004
Reply to Office action of September 8, 2004

Claim 6 (Original): The input method of claim 3 wherein the character recognition algorithm utilizes a second standard for character recognition, and adapts the second standard to handwriting characteristics of the user.

5

Claim 7 (Original): The input method of claim 6 wherein the handwriting characteristics of the user corresponding to the first character are added to the database.

10 Claim 8 (Original): The input method of claim 3 wherein the auxiliary input method involves the use of a keyboard to generate the first character.
